

Hear Schubert

Last Thursday the members of the Strohaver Science Club heard C. F. Schubert, President of the College Camera Club, in an interesting lecture on "Photography and Photographic Development." The science and technique and chemistry of photography were briefly explained, and during the lecture a roll of films was developed to demonstrate the simple process.

Members of the Club who wish to become Fellows are asked to submit their marks in science subjects to Bruno Zwolinski. Only Fellows are eligible to vote in the elections and to direct the Club's activities.

Yesterday the organization made a trip through the Huntley plant of the Buffalo Niagara Electric Company.
