

Interviews for Job Openings

Now that the examination period has passed, Senior students who have applied to the College Placement Bureau for assistance can expect to be called for occupational interviews. Personnel representatives from Buffalo business and industrial organizations will visit the campus of Canisius College this month for the purpose of interviewing students of the Senior class interested in obtaining positions commensurate with their interest, aptitude and ability.

Remember, you will not be considered for these interviews until you have filed an application with the Placement Bureau and have been interviewed by the Placement Director.

Seniors Take Test

A significant number of the Senior class took the Federal Civil Service Examination, "Professional and Technical Assistant," on Sat-

urday, January 14, 1950. Last year the eligible list for this examination was exhausted almost immediately and we are told that this same situation exists this year. It is unfortunate that more Seniors didn't avail themselves of the opportunity.

An unprecedented number of announcements have been received by the Placement Bureau from State and Federal Civil Service Commissions.

Probably the most important to the student body is the federal announcement entitled, "Junior Scientist and Engineer." This examination is open to professional personnel and also to Senior, Junior and Sophomore students. The respective fields covered by this examination are chemistry, physics, engineering and metallurgy.

Registers to be established for these examinations will be used to fill positions in various Federal Government agencies in the states of New York and New Jersey. This examination is especially designed for college and university students. Educational courses may be substituted for experience, thereby giving the student personnel group a chance to qualify. *Remember*, the closing date for filing for these examinations is **January 24, 1950**. Application forms, announcements, circulars and sample tests are available at the College Placement Office, Room 10, Dewey Hall.

There are numerous State Government announcements for social case workers, librarians, educational

this year's forgotten man.

personnel, etc., for which college personnel could qualify.

It is generally agreed that the period of rapidly-gaining unemployment, which characterized the spring and summer of 1949, was a period of postwar-boom readjustment which everyone had expected and predicted, and that the scene is now set for a season of reasonably high employment and favorable job opportunities. The situation in the Buffalo area seems to have loosened up somewhat and there seems to be a significant demand for new personnel.

Remember, there are still a number of Senior students who haven't as yet reported for their occupational interviews with the Placement Director. A delay in filing your application for placement services will deny many worthwhile opportunities in the world of work. In order to be considered for employment *after graduation day*, you must make plans *now*.
