

# Canisius A.C.S. Affiliate Ranks in Top Five Percent

The American Chemical Society Affiliate at Canisius has been placed among the top 5% of the 283 schools rated by the National American Chemical Society. The affiliates were rated on the bases of their activities during the '59 - '60 school year.

As a part of this year's program the members of the society toured the facilities of the Frontier Oil Refinery last Tuesday. Last month they

heard Dr. Raymond Annins, Associate Professor of Chemistry at Canisius, speak on "Research in Heavy Chemicals."

The Society will be host to the students of the Rosary Hill, D'Youville, University of Buffalo, and Buffalo State Chemical Clubs at the annual joint meeting of these groups November 20.

Plans for the immediate future include a Christmas party and sports stag.
